

RYAN L. BURRELL

Senior IT Manager — Service Delivery & Application Support

IT Operations · Major Incident & Problem Management · Team Leadership

Greater Toronto Area, ON · 437-784-7827 · ryanlb@gmail.com · linkedin.com/in/ryan-burrell

PROFESSIONAL SUMMARY

Senior IT management professional with 20+ years of experience and a decade leading technology teams across application support, service delivery, IT operations, and incident management. Combines deep, hands-on production-support expertise (Tier 1–3) with proven people leadership — building and coaching high-performing teams, owning SLAs and service KPIs, and leading major incident response in mission-critical, 24/7 environments. Track record of measurable results: 82% reduction in major outages, 99.9%+ application availability, and significant service-desk performance gains. ITIL v3 certified and PSM I, with strong ServiceNow/ITSM, data analytics, and vendor-management experience, and a continuous-improvement mindset that modernizes operations through automation and AI. MSc in Management Information Systems and BSc in Computer Science.

KEY ACHIEVEMENTS

82% — Year-over-year reduction in major system outages through stronger monitoring, incident response, and change controls

99.9%+ — Application availability sustained across a portfolio of mission-critical systems while leading an engineering team

4 min to <90 sec — Reduced service-desk Average Speed of Answer; cut call abandonment from 13% to under 5%

182+ — Locations supported by national IT operations across corporate and retail environments

CORE COMPETENCIES

IT Operations & Service Delivery	Application & Production Support	Major Incident & Problem Management
Team Leadership & Coaching	ITIL Service Management	SLA / KPI Ownership & Reporting
ServiceNow / ITSM Tools	Root Cause Analysis & PIRs	Vendor & Stakeholder Management
Data Analytics & Reporting	Continuous Improvement & Automation	AI-Driven Modernization

PROFESSIONAL EXPERIENCE

Jan 2026 – Present

Technical Support Manager | Mahaba House

- Principal technology advisor managing cloud infrastructure (Microsoft 365), IT operations, vendor relationships, and service continuity; lead AI-enabled modernization of digital operations and content production.

2019 – Jan 2026

Manager, Information Systems | The Home Depot Canada

Led national IT operations, service desk, and application support across 182+ corporate and retail locations in a 24/7 environment — owning incident governance, SLAs, team development, and continuous improvement.

- Led and coached technical support teams through structured 1:1s, performance reviews, and development planning, building an accountable, high-performing, customer-first culture.
- Owined service performance against SLAs and KPIs — reducing Average Speed of Answer from 4 minutes to under 90 seconds and call abandonment from 13% to under 5% through resource modeling, scheduling, and automation.
- Served as senior escalation point and major incident lead, applying ITIL-aligned incident, problem, and change management with Root Cause Analysis and Post-Incident Reviews to reduce recurrence.
- Administered ServiceNow (incident, problem, change, knowledge) and leveraged BigQuery ML, Power BI, and Tableau to shift operations from reactive to proactive, data-driven service.
- Drove modernization and automation — codifying support into operational playbooks that powered an AI-driven self-service tool — and partnered with vendors and architects on system and telephony implementations.

2017 – 2019

Senior Functional Support Lead | The Home Depot Canada

- Primary IT support lead for 182 retail locations; key liaison between sites, internal IT, and vendors, resolving complex application and infrastructure issues.
- Designed reporting to identify incident trends through statistical anomaly detection and optimized scheduling to align resources with demand.

2015 – 2017

IT Business Operations Manager – Telecommunications | Digicel Group

Led cross-functional engineering teams supporting mission-critical telecommunications billing, rating, charging, CRM, and provisioning systems.

- Led a diverse engineering team at 99.9%+ availability; established incident management as a cornerstone of operations, achieving an 82% year-over-year reduction in major outages.
- Reduced subscription/billing errors by 95% within three months; led enterprise platform upgrades, managed vendors, and participated in Change Advisory Board (CAB) reviews.
- Fostered a culture of continuous improvement, accountability, and high performance.

2008 – 2015

Senior Application Support Engineer (L3) – Telecommunications | Digicel Group

- Provided 24/7 Tier 3 production support for mission-critical rating, charging, CRM, and billing platforms under strict SLAs, serving as a senior technical authority.
- Developed custom middleware fixes and automation (Bash, Python, Perl) to resolve recurring issues; collaborated with vendors on remediation and led integration testing.

EARLY CAREER HISTORY

2004 – 2008

Technical Administrator | The UWI Development and Endowment Fund (Non-Profit)

- Web development, system administration, and enterprise application support for Banner and Raiser's Edge applications.

2003 – 2004

Web Administrator | The RJR Communications Group

- Web development, graphic design, and web/system administration for a major media and communications group.

EDUCATION & CERTIFICATIONS

Master of Science – Computer-Based Management Information Systems — University of the West Indies

Bachelor of Science – Computer Science — University of the West Indies

ITIL v3 Foundation — EXIN (2016)

Professional Scrum Master I (PSM I) — Scrum.org (2025)

Google AI Professional Certificate — Google (2026)

TECHNICAL STACK

ITSM & Service Management: ServiceNow (incl. Predictive Intelligence), Jira, ITIL v3, Incident / Problem / Change Management, CAB, PIRs, SLAs/OLAs

Enterprise & Telecom Apps: SAP, Redknee NGRC, CSG Interconnect, Alepo, CRM/Billing Systems

Cloud, Data & Monitoring: Microsoft 365, GCP (BigQuery ML), Power BI, Tableau, Splunk, SolarWinds, ETL Pipelines

Support & Scripting: Tier 1/2/3 Support, Cisco/Avaya/Telus telephony, Bash, Python, Perl, DAX, Power Query

Leadership: Team Leadership & Coaching, Vendor Management, Stakeholder Communication, Continuous Improvement, AI/Automation
